The MedTech Lasers CHROMA Tech is an upgradable system, allowing you to expand your business and clinical offerings based on patient demands

ADVANCED LASER HAIR REMOVAL

CHROMA 4D-HR

equipped with a High-Speed Diode Laser, engineered with four distinct wavelengths (755nm, 808nm, 940nm, and 1064nm) to deliver maximum results and to facilitate the widest possible spectrum of hair.

Suitable for All Skin Types (1-6)

Caters to a broad spectrum of skin tones, from fair to dark, ensuring inclusivity and effectiveness for all your clients.

Interchangeable Tips for Precision

With its versatile interchangeable tips, 4D HR adapts seamlessly to various treatment areas. Whether it's large areas like the back, chest, and legs, medium zones such as arms, underarms, and bikini areas, smaller regions like the face and neck, or even hidden areas like ears and nose, precision and effectiveness are guaranteed.

Painless and Lightning-Fast

Equipped with an advanced cooling system, your clients will experience virtually painless treatments even in the most sensitive areas, and unparalleled speed.

CHROMA CLEAR

ADVANCED IPL

CHROMA CLEAR Light technology with advanced cooling system and interchangeable wavelength-filters, allowing you to bespoke your treatments for your clients' upon their unique needs.

480nm Combat Acne Breakouts Blue light is highly effective in targeting acne and acne-prone skin. It eliminates acne-causing bacteria, reducing the severity and frequency of breakouts.

Enhance your treatment portfolio by delivering clearer, blemish-free skin to your patients.

530nm Address Pigmentation and Redness Green light is ideal for treating pigmentation concerns such as sunspots, age spots, freckles, and redness. It promotes even skin tone and texture, helping clients achieve a more youthful appearance.

Expand your services to include effective pigmentation and redness reduction treatments.

590nm - 640nm Rejuvenate and Improve Skin Tone Yellow light stimulates collagen production and improves overall skin tone. It's perfect for clients seeking skin rejuvenation and a radiant complexion.

Offer anti-ageing solutions and help clients look and feel their best.

755nm - 690nm Hair Removal in SHR mode The extra hair removal solution will allow you to provide an extra 'Pain Free' service to your patients as required.

"It's the flexibility to provide a comprehensive, cutting-edge range of treatments and the ability to offer tailored, highly effective solutions to your clients that sets you apart from the rest."

CHROMA REMOVE

TATTOO REMOVAL

Wide Spectrum in One System

The high power Q-switched Nd:YAG 1064nm laser equipped with 532nm is ideal to remove all possible ink colours, including the more resilient bright spectrum (red to yellow) spectrum, in most precision way.

NAIL FUNGUS

Clinical research trials show laser treatment success being as high as 90% with multiple treatments FOR Onychomycosis, (a common nail fungus). Using our CHROMA REMOVE Q-Switch 1064nm equipped with the 532nm tip, will ensure efficient, precise and painless solution.

NEVUS OTA & BIRTH MARK

The CHROMA CLEAR, equipped with Q-Switch and tips to treat conditions such as Nevus OTA and birthmarks. CHROMA REMOVE ensures gentle and precise treatment for these skin irregularities
